

Some Seasonal Reminders and Helpful Hints

- Turn off the water to the exterior faucets to prevent pipe freezing and possible unit damage during the colder months.
- Check to determine if you need to replace batteries in all smoke detectors.
- Remove any remaining annual plants/and or perennials you may have placed out earlier in the year.
- When covering and winterizing your outdoor grill for the season, please keep in mind that indoor storage of propane tanks is a violation of Connecticut law and a significant safety hazard. The tanks should be stored safely outside of the unit including the garage.
- Holiday decorations will be provided for the entire community. Your external personal decorations are limited by association rules and regulations.
- During snow removal season, please use some discretion in placing your trash barrels at the curb the evening before if it is snowing or there is a high probability of snow that evening. Trash barrels should be put out on **Tuesday morning** for pick-up when there is the potential for unfavorable conditions. This will help General Landscaping do a more effective job in clearing snow from in front of the units.
